Using Data to Promote Equity and Positive Outcomes for Students with Disabilities

A virtual seminar series for Preservice Educators

This 10-module video seminar is to provide information about equity and data-based decision-making while delving into academics, behavior, and transition. The seminar equips participants with knowledge and skills to utilize data for promoting equity and fostering positive outcomes for students with disabilities. By the end of this seminar participants should be able to leverage data to enhance educational experiences in alignment with inclusive principles and will receive a certificate of completion.

Outcomes

- 1) Increase knowledge of data available to inform practices at the student, classroom, school, district, and state levels.
- 2) Interpret data using an equity-centered lens and mindset to ensure data are collected, analyzed, interpreted, and shared with diverse stakeholders without bias or exclusion.
- 3) Apply an equity-centered lens in data-based decision-making across academics, behavior, and transition.
